

HAV IgM ELISA Kit

Catalogue No.: BTA-K1568

Hepatitis A Virus IgM ELISA Kit is an ELISA Kit against Hepatitis A Virus IgM.

Target:	Hepatitis A Virus IgM (HAV IgM)
Reactivity:	Human
Tested Applications:	ELISA
Recommended dilutions:	Optimal dilutions/concentrations should be determined by the end user.
Storage:	Shipped at 4 °C. Upon receipt, store the kit according to the storage instruction in the kit's manual.
Validity:	The validity for this kit is at least 6 months. Up to 12 months validity can be provided on request.
Stability:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Standard Form:	Lyophilized
Detection Method:	Colorimetric
Assay Type:	Capture
Assay Data:	Qualitative
Sample Type:	Serum and plasma.
Note:	<p>This product is for research use only.</p> <p>Please note that our ELISA and CLIA kits are optimised for detection of native samples, rather than recombinant proteins. We are unable to guarantee detection of recombinant proteins, as they may have different sequences or tertiary structures to the native protein.</p>
